### Reflection

What were your main goals in this time period?

During this time, my main focus was on my internship, where I work on building my team's database to ensure accurate, accessible, and up-to-date resources for team operations. I also attended orientation, reviewed my course syllabus, and completed assigned coursework. Additionally, I met with my work supervisor to discuss the course, its objectives, and the possibility of him serving as my supervisor for it. These experiences helped me balance my academic and professional responsibilities effectively.
